

RVReviews.net Model Year Comparison Checklist

How to use this Checklist:

1. Enter as much information as you can in the 2018 model column, putting special emphasis on the features that are important to you.
2. In the 2019 column enter either "Same" or note the new feature.
3. Enter the MSRP and the discounted net price –this is the final price you negotiate with the dealer.
4. Compare the differences between the 2018 and 2019 models versus the cost savings.
5. Determine if the more expensive model year (usually the newest one) is worth the extra expense.
6. Purchase the RV that works best for you and, if that is the discounted 2018 model, use the money you saved to take your first several trips courtesy of RVReviews.net.
7. Send some feedback to RVReviews.net about your new RV so we can pass on your input to the next customer.

	Features and Specifications	2018	2019
	Chassis/Body
